Introduction

This report presents the developments in merchandise exports and imports of the Kingdom of Saudi Arabia for August 2018 as compared to the same period of the previous year, August 2017, according to the statistical methods and various classifications. The data for this report were collected from the Saudi Customs and the Ministry of Energy, Industry, and Mineral Resources.

All the data contained in this report and more details are attached to this report in an Excel file, which could be downloaded from the website of the General Authority of Statistics (GaStat). 

It should be noted that the statistics presented in this report are preliminary and they may undergo some modifications in case of a data update.

Note: There might be some differences in the aggregates of numbers or percentages due to rounding.

Methodology

Description

This report presents the statistics on exports and imports of the Kingdom of Saudi Arabia for the latest month with available data in comparison with the same period from last year. It highlights the main developments with summary tables and charts. Given the importance of oil exports to the Saudi economy, total exports are separated into oil exports and non-oil exports. Non-oil exports and imports are then presented in various classifications such as by section (HS), by group of countries, by partner countries, by means of transport and customs port. Appendix tables are also given at the end of the report and in a separate Excel file that could be downloaded from the GaStat website.

Data Collection, Processing, and Dissemination

The General Authority for Statistics receives the monthly data from two sources; (i) Saudi Customs and (ii) Ministry of Energy, Industry, and Mineral Resources.

The data pass through several stages of treatment before dissemination, as explained below.

First Stage:

Entering the data on the system of foreign trade statistics to obtain a preliminary review of commodities, countries, and customs centers to ensure consistency and comprehensiveness of the data.

Second Stage:

The implementation of processing programs for detailed customs data, through the application of auditing rules and automatic correction to extract notes. These notes are either processed directly by expert statisticians in the Department of Foreign Trade Statistics or investigated from its official source. This stage continues until the monthly data is completely audited and corrected.

Third Stage:

Aggregation of monthly data by commodity and country automatically by means of programs dedicated to this purpose. After that, a final and comprehensive review is conducted and thus the data become ready to be published.

Fourth Stage:

Various tables for different classifications are extracted from the system to prepare the monthly report. The report is published on a regular basis every month on the GaStat website.

Classification Used

The basic data on the foreign trade included in this report is based on the Harmonized Commodity Description and Coding Systems, known as the Harmonized System (HS).

Concepts and Definitions

Exports (Total):

Exports consist of exports of domestic goods (national exports) and exports of foreign goods (re-exports).
Valuation is on Free-on-Board (FOB) basis.

National Exports:

Exports of all goods fully produced or manufactured in the country or undergone some modifications that lead to a change in their shapes and values.

Re-exports:

Refers to the sale of previously imported goods abroad without any clear modifications on them.

Oil Exports:

Exports of goods classified in Chapter 27 (mineral fuels, mineral oils and products of their distillation; bituminous substances; mineral waxes) of the Harmonized System (HS).

Non-oil Exports:

Total exports minus exports of goods classified in Chapter 27 (mineral fuels, mineral oils and products of their distillation; bituminous substances; mineral waxes) of the Harmonized System (HS).

Imports:

Refer to all goods entering the country after passing through the customs procedures to meet its local needs.
Valuation is on Cost, Insurance, and Freight (CIF) basis.

Trade Volume:

The sum of exports and imports.

Trade Balance:

Total exports minus imports.

Non-oil Trade Balance:

Non-oil exports minus imports.

Monthly change:

Change from the previous month.

Annual change:

Change from the same month of the previous year.

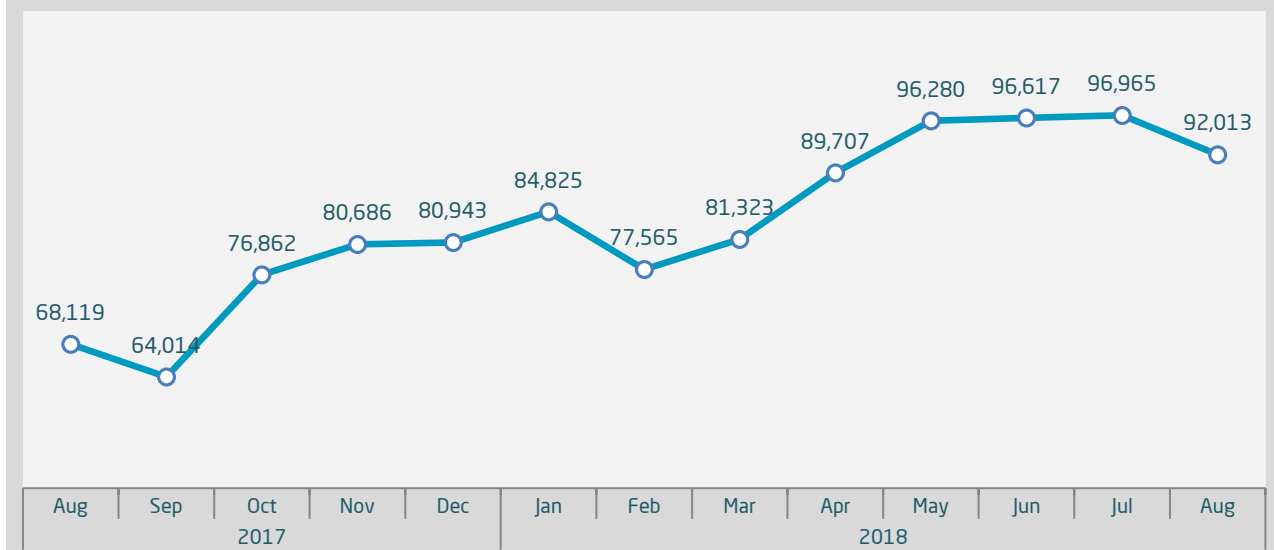

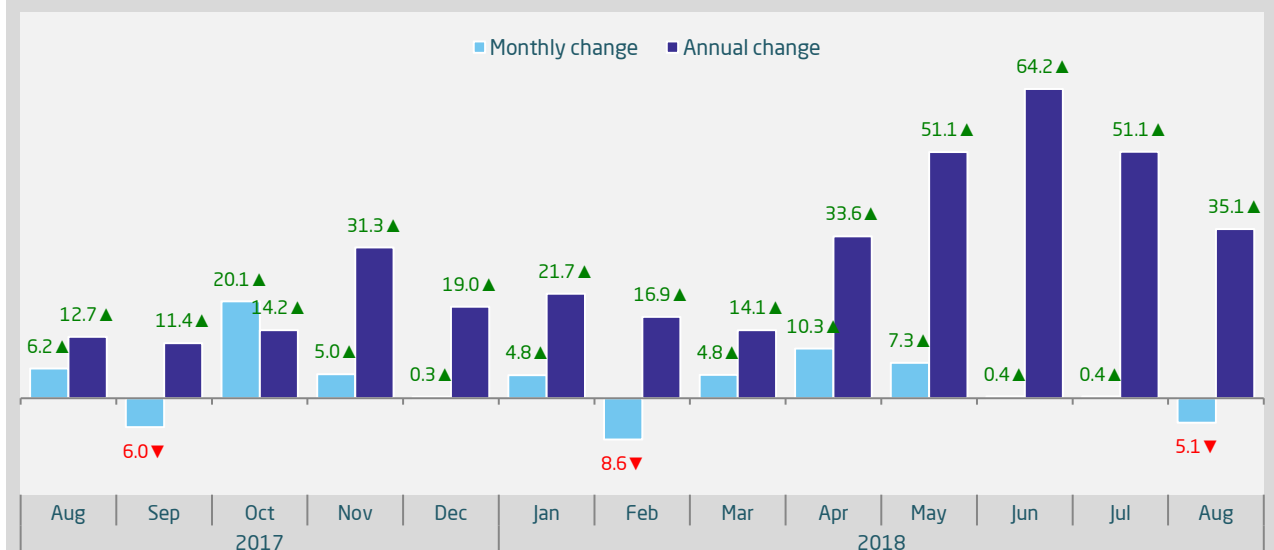

1. Merchandise Exports

Merchandise exports of Saudi Arabia amounted to 92013 million riyals in August 2018 compared to 68119 million riyals in August 2017, with an increase of 23895 million riyals or 35.1%. Merchandise exports in August 2018 were, however, lower than those in the preceding month (July 2018) by 4952 million riyals or 5.1%.
