

Consumer Price Index

(Base Year: 2013)

October 2018

Introduction

The Consumer Price Index (CPI) is one of the most important indicators issued by the statistical agencies on a regular basis. This figure reflects the changes in the prices of a fixed market basket of goods and services during a specified period of time and it is comprehensive and representative of the different categories of the country's population. Economic and statistical reports and analyzes of price movements and future forecasts during different time periods.

The Price & Index Numbers Statistics Department received the final results of the household expenditure and income survey 2013. The Department reviewed the data and coordinated with the Department of Social Statistics and the Department of National Income Statistics and the Department of Application Development during various stages of work. The new basket of goods and services was prepared from the results of the expenditure and income survey of 2013, which showed a relative importance of 0.03% or greater. The total items in the new basket of goods and services are (470) items.

General Authority for Statistics Price & Indexes Statistics Fax: (4014138 #1196)

P.O. 3735 Riyadh 11481 E-mail: Info@stats.gov.sa

Methodology of Consumer Price Index

1-Description:

It is one of the essential economic statistics that are concerned in individuals' daily life. This kind of statistics provides information that are necessary for recognizing the prices movement general tendency, and observing the changes in commodity and services prices during the phase of retail selling in Saudi market by calculating the consumer price index.

2-Definition of consumer price index:

A statistical metric that measures changes in the prices of a stable market basket of commodity and services.

3-Objective:

Prices surveys aim, in general, to provide data on consumer prices for goods and services included in the consumer basket and provide data on index numbers of the consumer prices within a time series data.

4-Uses of consumer price index:

Consumer price index data are considered a statistical mean for:

- ✓ Supporting appropriate economic decision making by following changes in the consumer price index and its components.
- ✓ Measuring the changes in prices of purchased commodities and services.
- ✓ Measuring the burden of the consumer and how it develops according to changes in prices.
- ✓ Measuring the economic inflation and regression (in Saudi economy).
- ✓ Measuring the change in actual wages.
- ✓ We can rely on them in the economic and statistical analysis of prices, and to make future estimations.
- ✓ They are used as a metric to measure changes in currency purchasing power.

5- Periodic Publication:

The results of consumer price indices are published monthly.

6-Terminologies and definitions used:

| Term | Definition |
|---|--|
| Index number: | A number simply measures the amount of a given value change in a time period called the comparison period relative to another time period. |
| Commodity and services basket: | The actual group of commodity and services on which the household consumer spend for living purposes. |
| Expenditure and income survey: | The results of expenditure and income survey are used for recognizing the relative distribution of commodity and services expenditure in order to use them in structuring the cost of living index. Expenditure can be defined as (how much the household members spend to get commodities and services either what they spend for the household directly such as food, housing,etc, or the expenditure of some of the household members such as expenditure on clothes and personal stuff during a specific period of time. |
| Commodity and services relative significance: | The percentage of commodity and services expenditure compared to total commodity and services expenditure inside the consumer basket. |
| Sale points: | Institutions and units from which the prices of commodity and services, that are included in commodity basket, are collected. For example, retail shops such as groceries, clothing shops, and other kinds of shops like doctors' services, rental units (apartment, villa, a floor of a villa, old house), and other services shops. |
| Shadow sample: | A group of reserve sale points which can be referred to when it is necessary to change one of the basic sale points because of inability to get prices for any reason such as closing the shop or unavailability of a commodity. |
| Comparison period price | The price of any commodity or service in the current period of time. |
| Base period price: | The price of any commodity or service in a previous period of time compare to the current price. |

7- Sampling Units:

The sampling units in the consumer price index survey are:

- Consumer goods obtained by the individual from points of sale at the retail price.
- ✓ Service received by the individual points of service delivery at retail price.
- ✓ The housing units that are rented by individuals for the purpose of housing.

8-Coverage (Inclusiveness):

The prices are collected from sixteen cities in the Kingdom representing the capitals of the administrative regions and three other cities. The sixteen cities are: (Riyadh, Makkah, Jeddah, Taif, Hofuf, Madinah, Buraydah, Dammam, Abha, Tabuk, Hail, Arar, Jazan, Najran, Baha, and Sakaka).

9-The Base Year:

The base year of the consumer price index numbers for the entire population has been approved and shifted from 2007 to be 2013 where the household expenditure & income survey was conducted.

10-Used classification methodology:

The classification of individual consumption according to purpose (COICOP)

11- Item description:

The descriptions of the goods are defined accurately, including (brand, weight, type, size, country of origin, etc.) because such factors greatly affect the price.

12- Design survey application.

The collection of data for the consumer price index applications were prepared by the specialists in the Price Statistics department as follows:

12-1 Application of data collection for items and services from point of sale:

This application includes geographical data to assist in reaching points of sale such as: (shop number, shop name, city, neighborhood, alley number, sector number, block number, street, location, and coordinates) It also includes a

description of the item or service to be monitored for its price, specifications, and changes such as: (item code, item name, current price, previous price, unit of measurement type, analysis code, and pricing cycle). In addition to the following price factors: (brand, country of origin, package type, model, size, type, quality, etc.). These applications have been applied electronically to the devices through which data are collected.

12-2 Application of data collection for rental units:

The geographic data includes assistance to reach the rental unit, such as: (city and its number, neighborhood, alley number, sector number, building number, number of units, block number, real estate unit number in the building, street number, location, and coordinates). This includes the unit type, the pricing cycle, the distinguishing features of the real estate unit: (number of rooms, number of floors, number of bathrooms, provision of water, provision of electricity, provision of the kitchen), pricing period, paid rent, analysis code, the services included in the rent are: (water, electricity, kitchen, furniture, air conditioning). These applications have been applied electronically to the devices through which data are collected.

13- Sample of goods and services:

Before creating the basket of goods and services for the consumer price index a survey of the household expenditure and income is required which aims to identify the consumption patterns of households. It is the main and only source of data required to update the weights (relative importance) of goods and services included in the consumer price index basket.

13.1: Weights (relative importance) used in the composition of the consumer price index:

After obtaining the results of the household expenditure and income survey of 2013, which is based on a list of goods and services and the value of what was spent on each, the weights used in the calculations of the consumer price index was calculated. Each item at the level of the Kingdom was given a weight equal to the percentage spent on total consumption expenditure, the importance of the commodity, which gives each commodity importance commensurate with the value of what is consumed, and the weights were created at the level of chapters and groups and sections, and calculated the relative importance of using the following equation:

Total expenditure on the item during the household
Expenditure and Income survey period

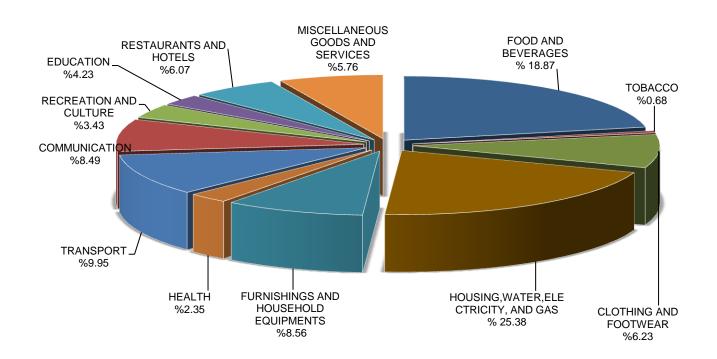

Total general expenditure of all items during the
Household Expenditure and Income Survey period

Total general expenditure and Income Survey period

The following table shows the relative importance (weights) at the division level:

| Expenditure Divisions (2013) | COICOP Code | Relative importance |
|---|----------------|------------------------|
| General Index | 0 | 100.00 |
| Food and beverages | 01 | 18.87 |
| Tobacco | 02 | 0.68 |
| Clothing and footwear | 03 | 6.23 |
| Housing, Water, Electricity, Gas, and Other fuels | 04 | 25.38 |
| Furnishings, Household, Equipment and | 05 | 8.56 |
| Health | 06 | 2.35 |
| Transport | 07 | 9.95 |
| Communication | 08 | 8.49 |
| Recreation and Culture | 09 | 3.43 |
| Education | 10 | 4.23 |
| Restaurants and Hotels | 11 | 6.07 |
| Miscellaneous Goods and Services | 12 | 5.76 |

13-2: Selection of the basket of items (goods and services) according to the results of the Household Expenditure and Income Survey 2013.

After calculating the relative importance of the total list of items, the content of the consumer price index basket is determined. Each item weighing or exceeding 0.03% weight within the consumer price index basket, which weighs less than 0.03%, is distributed on its items in a proportional way. This percentage was chosen as an acceptable percentage in terms of coverage of most of the goods received from the Household Expenditure and Income Survey. Most countries use this ratio; thus, we obtained a basket of items containing 470 items.

14-Point of sale sample:

14-1: Search Point of Sale (POS):

The purpose of this survey was to identify and limit the establishments engaged in retail activity (sale of goods, delivery of service), the required prices, the leased units and the formation of a general framework for the purpose of selecting a sample of these institutions and units to collect the prices of items included in the installation the consumer price index, as well as the identification of shade samples that are used as an alternative to the basic sample in the event that one of those points stopped working for some reason.

14-2: POS framework:

An appropriate framework was set up for the retail and leased enterprises including a number of technical controls in a timely manner that govern this process. The most important technical controls used were the following:

- ✓ The use of the results of the 2010 Census of Establishments to give distribution at the level of neighborhoods within the pricing cities by economic activity according to the classification of (ISIC4) at the level of (2,4, and 6) limits, especially with consideration to retail, wholesale, and retail establishments and services.
- ✓ Benefiting from the framework of the current Census of Population and Housing in determining the leased units.

- ✓ Utilization of city maps and distributions of neighborhoods, sectors and blocks.
- ✓ Benefiting from the current framework of establishments and leased units used in the survey of consumer price index.

Take account of the shopping scale changes of different types of sources of sales and purchases by sub-groups obtained in the final results of the Household Expenditure and Income Survey 2013.

14-3: Drawing Sample:

The points of sale from which the prices of different goods and services are collected are based on:

- ✓ Population size of the geographical area.
- ✓ Specialty point of sale.
- ✓ Percentage of the number of shops available in the general framework of the census of enterprises at the city level.
- ✓ Market type.
- ✓ Shopping percentage based on the Household Expenditure and Income Survey results at city level.
- ✓ Shopping ratios are linked to the type of point of sale.
- ✓ Percentage distribution of points of sale by business.
- ✓ The volume of employment at the point of sale.
- ✓ Pull a shadow sample to be used if the original point of sale is not available.

It includes the following data:

- ✓ Names and addresses of retail and service organizations.
- ✓ List of goods and services provided by those institutions.
- Coordinates of longitude and latitude for institutions to be used for quick access and subsequent application of quality control program to ensure accuracy of the data.
- Describe the activity of the point of sale and whether it is specialized or not specialized.

The sample was divided according to the population as follows

| Population | Cities | Number Point of sale per item |
|---|--|----------------------------------|
| More than (1) million people | Riyadh, Makkah, Jeddah, Dammam | 10 POS |
| More than 400 thousand and less than one million people | | 7 POS |
| Less than 400 thousand people | Hail - Jazan - Najran - Baha - Skaka - Arar | 5 POS |

15-Collecting Data:

The method of data collection was determined according to a number of controls and criteria as follows:

- ✓ Adopt the method of collecting price data from point of sale personally by interviewing.
- ✓ Data collection using tablets instead of writings for more efficiency.
- ✓ Covering all goods and services by points of sale (large, medium, small, depending on specialization and volume of labor within the source).
- ✓ Adopt the price on the day of the visit to the point of sale.
- ✓ Determining the exact specifications of items throughout the Kingdom to include the most important price factors affecting the price of the item such as commodity and its brand, weight, country of origin, size, etc.
- ✓ Commitment to pricing cycle for each item (weekly, monthly, quarterly, semi-annual).

15-2: Upload and archive data and metadata collected on databases:

- ✓ The field researcher in all the regions in Saudi Arabia starts to upload the collected data directly using the tablet on hand.
- ✓ Tablets are linked to a central database where processing is automated.
- ✓ Historical data is preserved in the databases.

15.3: Processing of Collected Data:

- ✓ Ensure the logic and comprehensiveness of data and prices.
- ✓ The establishment of a number of automated auditing rules during the processes of entry, review, processing and publishing to identify errors and observations and then addressed and corrected.
- ✓ The use of technical platforms in the collection and auditing of data from all regions of the Kingdom and linked to a unified audit and audit center in Riyadh.
- Connecting Tablets that are used by the researcher to a timely reviewed screen that are available for supervisors to alert for any observations and errors from the inserted data.
- ✓ Check the coordinates of the place where the data were automatically completed in order to confirm the visit when the form is completed and the coordinates appear automatically when the data is reviewed later by any of the supervising categories.
- ✓ Apply a re-preview form by the supervisor or quality controller to return the visit to the point of sale from which the data was collected by the researcher to verify the accuracy and accuracy of the data.
- Comparisons and field matching of commodity prices that are randomly selected and automatic.
- ✓ Application of withdrawals for commodities and changing sources.
- ✓ Follow-up verification by selecting sample points of sale and communicating with them to confirm the accuracy of the data.

15-4: Follow-up of data collectors:

The tablet devices used by the researcher are linked to a timely review screen available to administrators showing the synchronization of data with the researcher in the field directly, and alerting to the existence of any observations or errors about the data entered into the system.

16: Steps to Calculate Consumer Price Index:

16-1: Data processing and auditing:

Processing of the data received from the branches of the Authority is one of the most important practical steps in the success of the CPI program. It is coordinated with the application development department of the Authority on the input, processing and publishing programs have a number of axes or steps are as follows:

- ✓ Price gathering: Prices are collected from sale points in the respective cities through the use of Tablets.
- ✓ The review in the branches and offices of the Authority is carried out by the supervisor of the consumer price program on a daily basis in parallel with the entry stage. A set of general and special correction rules are applied for this stage. Also, to ensure the comprehensiveness of field pricing and continuous input of the data at the level of the item or researcher.
- Perform automated and manual data review by your local supervisor (check input correctness, comprehensiveness, and review data accuracy).
- ✓ The data review is then completed in a number of steps as follows:
 - Comparisons of price developments between cities by analysts for each item, chapter, section and group through program outputs.
 - Checking price data automatically according to pre-programmed programs and performing a number of tests of data collected (e.g. price development and change from the previous month and the same month of the previous year at the total and city levels).
 - There are some difficulties and problems that may be encountered in the process of collecting prices, for example the disappearance of the commodity or the emergence of a new commodity as well as seasonal goods at the level of all or part of the outlets, and therefore have been developed codes for cases that may face the data collector, During the index program.

16-2: Equations used in calculating the index:

The modified Laspeyres equation was used in the process of calculating the consumer price index, which is based on the use of the geometric mean of proportional distribution, while the old Laspeyres equation uses the simple geometric mean, in line with the international recommendations in this regard, and is calculated in two stages:

The first stage:

Calculate the monthly change using the modified Laspeyres equation, and this equation will be applied at all levels. The equation formula is as follows:

L. I. N =
$$\left(\prod \left(\frac{\text{Current price}}{\text{Previous price}}\right)^{\text{Item weight}}\right)^{\left(\frac{1}{\text{Group weight}}\right)}$$

The second stage:

Calculation of the cumulative index using the series system (the previous index multiplied the monthly change that was extracted in the first stage), and this equation will be applied at all levels.

17- Most important results and indicators:

- ✓ The General Index of Consumer Prices and its Relative Monthly, Quarterly and Annual Changes.
- Consumer price Index and monthly, quarterly and annual comparative changes for each of the main divisions including:

Food and beverages division, tobacco division, clothing and footwear division, housing, water, electricity, gas and other fuels division, furnishings, household equipment and maintenance division, health division, transport division, communication division, recreation and culture division, education division, restaurants and hotels division.

18-Evaluation and data quality:

In order to ensure the highest possible accuracy and quality in the field data, an integrated program of qualitative data quality has been developed to control potential errors, as well as through a set of procedures developed by the Department of Price Statistics throughout the implementation of the field program, In the preparation of studies and sample design for points of sale and rented housing units and conduct theoretical and practical training for all field groups and select a group of qualified researchers in all cities of implementation of the program, and monitor and study the observations and suggestions received from the beneficiaries Of the results of the figure and the CPI output.

19-Publishing:

CPI data are published as follows:

- ✓ Publication according to specific monthly dates and announced in the official website of the General Authority for Statistics on the Internet.
- ✓ Using the official website of the Authority www.stats.gov.sa as an official and approved publishing platform.
- ✓ Publishing through other publishing channels such as the Authority's accounts in social networking sites.
- Communicate the results to beneficiaries in all their segments with the appropriate mechanism without delay.

Highlights of Consumer Price Index Movement (October 2018)

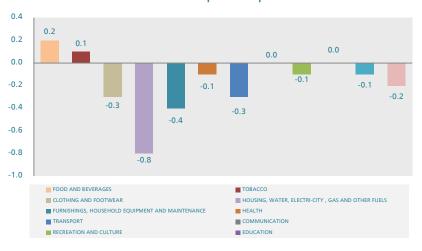

Monthly change

The Consumer Price Index for October 2018 recorded a decrease of 0.3% compared to the previous month (September 2018). This was the result of the following changes:

Decrease percentages

| Section | Percent Change |
|--|-------------------|
| HOUSING, WATER, ELECTRI- CITY, GAS AND OTHER FUELS | -0.8% |
| FURNISHINGS, HOUSEHOLD EQUIPMENT AND MAINTENANCE | -0.4% |
| CLOTHING AND FOOTWEAR | -0.3% |
| TRANSPORT | -0.3% |
| MISCELLANEOUS GOODS AND SERVICES | -0.2% |
| HEALTH | -0.1% |
| RECREATION AND CULTURE | -0.1% |
| RESTAURANTS AND HOTELS | -0.1% |

Monthly relative changes of main sections during the month of October 2018 compared to September 2018

Increase percentages

| Section | Percent Change |
|--------------------|-------------------|
| FOOD AND BEVERAGES | 0.2% |
| TOBACCO | 0.1% |

Unchanged Sections

- 1- COMMUNICATION
- 2- EDUCATION

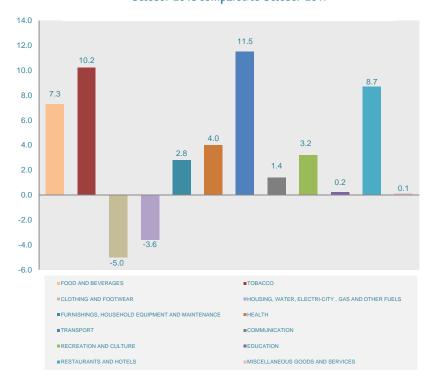

Annual Change

Consumer Price index for the month of October 2018, compared to its counterpart from the previous year recorded an increase of (2.4%) rate. This was the result of the following changes:

Increase Percentages

| Section | Percent Change |
|---|-------------------|
| TRANSPORT | 11.5% |
| TOBACCO | 10.2% |
| RESTAURANTS AND HOTELS | 8.7% |
| FOOD AND BEVERAGES | 7.3% |
| HEALTH | 4.0% |
| RECREATION AND CULTURE | 3.2% |
| FURNISHINGS, HOUSEHOLD EQUIPMENT AND MAINTENANCE | 2.8% |
| COMMUNICATION | 1.4% |
| EDUCATION | 0.2% |
| MISCELLANEOUS GOODS AND SERVICES | 0.1% |

Annual relative changes of main sections during the month of October 2018 compared to October 2017

Decrease percentages

| Section | Percent Change |
|---|-------------------|
| CLOTHING AND FOOTWEAR | -5.0% |
| HOUSING, WATER, ELECTRI- CITY, GAS AND OTHER FUELS | -3.6% |
