

CCI in Saudi Arabia rises by 2.4% in April 2026

The Construction Cost Index (CCI) recorded a 2.4% increase in April 2026, compared to the corresponding month of the previous year (April 2025). This increase is mainly attributed to a 2.4% rise in construction costs for the residential sector and a 2.7% rise in construction costs for the non-residential sector. (Figure 1)

Figure 1. Annual change in the general CCI (%)

Annual change in the CCI for the residential sector

CCI for the residential sector recorded an annual increase of 2.4% as a result of a 4.7% rise in the cost of renting equipment and machinery, driven by a 6.3% increase in the rental of equipment and machinery with operators, as well as an increase in labor costs by 2.8% compared to April 2025. In addition, energy prices recorded an increase of 3.0%. The prices of basic materials also increased by 1.2%, due to the increase in the prices of timber and joinery by 3.3% and plastic and glass products by 2.1% (Figure 2)

Methodology and quality

The Construction Cost Index (CCI) reflects the movements of construction input costs, consisting of 51 items. The prices of which are collected monthly from thirteen regions through field visits to contractors' offices, engineering offices, and construction material sales establishments. The year 2023 has been set as the base year, and the construction cost index statistics are published monthly. [Methodology and Quality](#), [table](#)
