National Code of Countries and Nationalities

February 2017

Introduction

The code of countries and nationalities is a world-standardized classification for countries that is set as per the Country Codes ISO 3166 issued by the International Organization for Standardization, another United Nations standard-setting body, which makes the list that defines codes for the names of countries, provinces and states. The code is the language of numbers that saves time and avoids mistakes when using names of the countries for statistical purposes. For example, numbers set on passports can be understood by everyone to refer for nationalities and names of countries.

Countries and nationalities were divided into the following groups:

- Countries by group are (the GCC countries, other Arab League countries, non-Arab Islamic countries, non-Arab non-Islamic Asian countries, non-Arab non-Islamic African countries, EU countries, European non-EU member states, North American countries, South American countries, Oceania countries and others)
- Nationalities by group are (nationalities of the GCC countries, other Arab League countries, non-Arab Islamic countries, non-Arab non-Islamic Asian countries, non-Arab non-Islamic African countries, EU countries, European non-EU member states, North American countries, South American countries, Oceania countries and others)

The Saudi code is divided into three sections:

- Alpha-2: A two-letter code that stands for names of the countries. It is common on internet for referring to country codes.
- Alpha-3: A three-letter code that stands for the official name of a country which is clearer than the two-letter codes.
- Numeric-3: A code composed of three figures that refer to a country or a province.

It is with the GASTAT outlook to be the creative key statistics reference in the Kingdom of Saudi Arabic for economic and social development, as per Article (4) of the GASTAT regulations which assigns the authority to prepare codes and statistical classifications under international standards, and in light of the authority's aspiration to do so, it has set this national code of countries and nationalities in accordance with the Country Code ISO 3166 which was issued by the International Organization for Standardization (ISO).
